

**The next M&E Course will be held at the
Baxter International, Inc. Corporate Headquarters
located in Deerfield, Illinois (Chicago Area)
May 5, 6, 7, 2010**

Course Objective: The objective of this intensive, three-day, lecture/problem-solving course is to help the student develop an understanding of the basic principles of both the microbiology and engineering aspects of sterilization processes. The content is directed toward heat processes, but the principles are applicable to all sterilization systems.

There are illustrative problems in each topic area of the M&E Course. In addition to the approximately 20 short problems, there are two instructor-led, case-study type sterilization/qualification problems: (1) physical qualification of the process and (2) biological qualification of the process.

Course Comments: Students' response, over the 30 years that the course has been taught, indicate that working the problems in the classroom was a major contributor to their educational experience.

Who Should Attend: Degreed scientists and technical managers involved in microbial control, in the research, development and manufacture of food, medical devices and pharmaceutical products.

The course fee is \$1,990 (USD) per person, which includes three books and continental breakfast, buffet lunch, mid-morning and afternoon refreshments. The course registration is limited to 35 students. This is a lecture-problem solving course, therefore the limited registration.

To Register for the Course: 1) Download registration form, complete the form, fax or mail to Ann Nicholas at 765.583.2488, P.O. Box 576, Otterbein, IN 47970; or 2) Request a registration form from Ann Nicholas by phone or fax. **Registration confirmation will follow upon receipt of completed form.** Please feel free to call Ann or email at pflug001@umn.edu for any questions or for further information.

Accommodations: A block of rooms will be reserved at the Marriott Suites, 2 Parkway North, Deerfield, IL, at a special rate, single or double occupancy. Please check this web site for details early in 2010.

Transportation: Chicago International Airport serves the area and transportation to the hotel can be arranged with American Taxi (Rate \$30); **Phone: 849.566.3131.** Transportation to Baxter from the hotel and back will be provided each day of the course.

If coming by private car, the facility is located just off the I-294 and the Deerfield Road Exit.

You will need a **scientific calculator and straight edge** to work the problems in the course. Please bring a calculator with which you are familiar.
